ILI SUPPORT SERVICES

Our Field Personnel have INTEGRITY

ILI SUPPORT CAPABILITIES

TIR trackers provide 24-hour field coverage, utilizing the latest technology for AGM Survey (sub-cm/dm/m GPS accuracy) & Pig Tracking. Field personnel are highly trained, cross-functional and regarded as the very best in the industry, arriving fully equipped with all the modern tracking technologies such as geophones, transmitters, receivers, computers w/ GPS navigation and tracking software.

- ◇ **Pig Tracking (ILI, gauging, cleaning)**
- ◇ **Above Ground Marker (AGM) Survey**
- ◇ **As-Built Drawings (traps, repairs)**
- ◇ **Tool Lifting/Loading**
- ◇ **Dig Staking & GPS Centerline Surveys**
- ◇ **NORM & Benzene Monitoring**
- ◇ **Remote/Online Pig Tracking**

Our trackers provide **VALUE**, with the ability to pre-determine threats which could potentially compromise a tool run or the safety personnel onsite.

"Admired & Respected"

TIR's field personnel are well respected in the industry, being identified as leaders, providing the best service out of any peer group.

TIR's quality control processes drive field operations to a higher standard. We have extensive experience tracking thousands of pigs in all types of applications and terrain. Remote/Online tracking is also achievable where standard tracking is not realistic (waterways, isolated areas, accessibility constraints, etc).

Differentiated field service is at the core of what makes TIR the ***BEST*** valued provider in the pipeline industry, proving it day-in and day-out.
